

TOBI OWOADE

SENIOR PRODUCT DESIGNER | UX/UI DESIGN | AI PRODUCT DESIGN | DESIGN STRATEGY

Toronto, ON • +1 (705) 905-0029 • tobiowoade22@gmail.com • [Portfolio](#)

PROFESSIONAL SUMMARY

I am a creative Product Designer with 6+ years of experience leading end-to-end product design across **AI applications**, enterprise **SaaS platforms**, mobile products, and customer-facing digital experiences. Proven ability to drive product strategy from discovery through launch by combining user research, rapid **prototyping**, **design systems**, and data-informed decision making. Passionate about leveraging AI-powered design tools to accelerate innovation and deliver exceptional user experiences. Proven ability to lead projects from user research and strategy through high-fidelity design, interactive prototyping, design systems, and implementation-ready interfaces. Experienced partnering with Product Marketing, Engineering, and cross-functional teams to create engaging demonstrations, scalable design assets, and storytelling-driven experiences that increase product understanding, customer engagement, and business impact. Proficient in **Figma**, interaction design, responsive design, usability testing, visual communication, and front-end collaboration, with foundational **HTML/CSS** knowledge and a passion for bringing innovative technology to life through exceptional design.

PROFESSIONAL HIGHLIGHTS

- **Technical Product Storytelling:** Designed digital experiences that transformed complex AI, SaaS, and enterprise product capabilities into customer-friendly interfaces, interactive prototypes, and compelling visual experiences.
- **User Experience Strategy:** Led end-to-end UX initiatives from discovery through high-fidelity design, leveraging user research, usability testing, and journey mapping to deliver experiences aligned with user needs..
- **Design Scalable UI:** Built and maintained scalable design systems, reusable components, and interface standards that improved design consistency, accelerated delivery, and streamlined collaboration across product teams.
- **Enterprise SaaS & AI Product Tools:** Leveraged AI-powered design and productivity tools, including ChatGPT, Claude and emerging AI platforms, to accelerate ideation, streamline content, and improve design workflows.
- **Research-Driven Design Decisions:** Conducted user interviews, competitive analysis, and usability testing, stakeholder research to uncover actionable insights that informed product strategy and feature prioritization.
- **Interactive Prototyping & Visual Communication:** Produced high-fidelity prototypes, user flows, wireframes, and that effectively communicated product functionality, design intent, and user interactions.
- **Customer Experience Optimization:** Simplified complex workflows into intuitive, accessible, and visually engaging experiences that improved usability, customer engagement, and overall product adoption.
- **Responsive & Front-End Design:** Designed responsive web and mobile interfaces with a strong understanding of HTML/CSS fundamentals, enabling seamless collaboration with development teams throughout implementation.
- **Marketing & Customer-Facing Experiences:** Created visually compelling product experiences and digital assets that strengthened product positioning, communicated technical value, and enhanced customer engagement.

WORK EXPERIENCE

Product Designer **March 2026 - Present**
TwoVera • Toronto

- Audit existing product experiences and synthesize insights from 8+ user interviews to identify usability gaps, uncover friction points, and recommend experience improvements that align user needs with business goals.
- Conduct in-depth user research and customer interviews to understand user behaviors, expectations, and pain points, translating insights into actionable product and design recommendations.
- Lead usability testing across critical user journeys, evaluating interaction patterns and identifying opportunities to improve usability, engagement, and overall product experience.
- Partner with Product, Engineering, and cross-functional stakeholders to translate research insights into intuitive user experiences, strengthening visual communication, interaction design, and overall product usability.
- Design end-to-end user flows that account for edge cases and complex scenarios, creating seamless, scalable experiences that support both user and business objectives.
- Create 120+ high-fidelity Figma screens, interactive prototypes, and reusable UI components that effectively communicate product functionality, support stakeholder alignment, and streamline developer handoff.
- Iterate on product designs based on user feedback, usability findings, and evolving business requirements, ensuring customer-facing experiences remain intuitive, engaging, and implementation-ready.

Product Designer **August 2025 - March 2026**
Lyric Chief • Toronto, ON

- Conducted and analyzed 8 user interview sessions across artists, managers, advisors, and music enthusiasts, synthesizing 24+ actionable insights that informed product strategy and guided the platform's redesign.

- Evaluated a comprehensive coin monetization framework, analyzing pricing models, digital wallets, moderation, rewards, and other core product components to deliver 20+ strategic recommendations.
- Led end-to-end UX design for key product features, including lyric annotations, quizzes, and engagement experiences, translating complex product concepts into intuitive user flows and high-fidelity Figma designs.
- Collaborated closely with the Founder and Product Manager to define product requirements, validate concepts, and iterate customer-facing experiences based on user feedback, business objectives, and technical feasibility.
- Produced polished design assets, interactive prototypes, and implementation-ready interfaces that effectively communicated product functionality, aligned cross-functional stakeholders, and streamlined developer handoff.
- Applied user-centered design principles to simplify complex user interactions, strengthen engagement, and deliver scalable digital experiences that balanced user needs with business goals.

AI Product Designer

April 2025 - December 2025

OmoAI • NY, USA

- Led primary and secondary research, including stakeholder interviews, user research, and competitive analysis, to define product positioning, validate AI chatbot use cases, and inform product strategy.
- Synthesized stakeholder requirements into comprehensive Product Requirements Documents (PRDs), aligning business objectives, technical capabilities, and user needs to improve project focus by 30%.
- Collaborated with global Product, Engineering, and cross-functional teams in an Agile environment to define feature priorities, coordinate release planning, and improve development efficiency by 40%.
- Built and maintained a scalable design system supporting both light and dark themes, creating reusable UI components that increased design consistency and improved design efficiency by approximately 50%.
- Designed a role-based enterprise administration platform enabling permission management, user and administrator activity tracking, billing management, and account lifecycle administration.
- Created high-fidelity interfaces, interactive prototypes, and implementation-ready design specifications in Figma, ensuring seamless collaboration between design and engineering teams.
- Translated complex AI workflows and technical requirements into intuitive, customer-focused experiences that balanced usability, business goals, and technical feasibility.

UI/UX Designer

December 2022 - December 2024

Sanlam Insurance

- Designed the Sanlam mobile application serving 500,000+ customers, enabling policy management, premium payments, e-mandate (direct debit) setup, and customer support through an intuitive, user-centered experience. The application achieved 20,200+ Google Play downloads and 8,000+ App Store downloads.
- Designed and delivered an enterprise CRM platform that streamlined customer service workflows, improved agent efficiency, and increased customer service interactions by 80%.
- Led the UX/UI design of customer-facing life and general insurance sales platforms, simplifying policy discovery, quotation, and purchase journeys to improve customer engagement and digital adoption.
- Designed an enterprise payment tracking and monitoring platform integrated with the NIBSS API, translating complex payment workflows into intuitive interfaces that improved transaction visibility and payment efficiency.
- Collaborated with Product, Engineering, and business stakeholders to transform regulatory, technical, and business requirements into scalable, implementation-ready digital experiences.
- Built an internal asset management platform supporting the real-time tracking and administration of 1,000+ organizational assets, including laptops, desktops, printers, and peripherals, improving operational visibility.
- Produced high-fidelity Figma designs, interactive prototypes, user flows, and reusable UI components that accelerated stakeholder alignment, developer handoff, and consistent product delivery.
- Applied user research, usability best practices, and iterative design principles to deliver accessible, responsive, and customer-centric experiences that aligned business objectives with user needs.

UI/UX Designer

April 2018 - December 2022

Adrian April Consult Canada

- Conducted user research, stakeholder interviews, and competitive analyses to identify user needs, pain points, and opportunities for improving digital experiences.
- Created user flows, information architecture, wireframes, interactive prototypes, and high-fidelity UI designs for web and mobile applications using industry-standard design tools.
- Designed intuitive, accessible, and responsive user interfaces that aligned with business objectives, user behavior, and modern UX best practices.
- Collaborated with product managers, developers, and cross-functional stakeholders to translate business requirements into user-centered design solutions.
- Planned and facilitated usability testing sessions, analyzed user feedback, and iteratively refined designs to improve user satisfaction and product usability.

- Developed and maintained scalable design systems, UI components, and style guides to ensure consistency across digital products and accelerate development.
- Produced detailed design specifications, user stories, and interaction documentation to support seamless implementation by development teams.
- Applied accessibility standards (WCAG), responsive design principles, and mobile-first methodologies to create inclusive and compliant digital solutions.
- Leveraged design and collaboration tools including Figma, Adobe XD, Photoshop, Illustrator, Miro, Jira, and Microsoft 365 to manage design workflows, present concepts, and support cross-functional collaboration.

PROJECTS

MiRoadmap - Immigration roadmap platform / Figma, Loveable, Figjam, Miro, Canva, ChatGPT

- Defined the product strategy and MVP structure for MiRoadmap, a web-app platform helping international students, newcomers, and work-permit holders in Canada navigate complex immigration processes.
- Structured 8+ core MVP features, including roadmap library, roadmap detail pages, saved progress, checklist tracking user dashboard, admin CMS, AI guidance assistant, and notifications/reminders.
- Developed the information architecture for 6 key user groups, including international students, newcomers, work-permit holders, returning users, community contributors, and institutional partners.
- Shaped 3 major landing page value pillars, verified roadmaps, community insights, and AI-personalized support to clearly communicate the platform's value to users and potential partners.

Meetra - Figma | FigJam | Miro | Loveable | Canva | ChatGPT

- Defined the end-to-end user experience for a two-sided ride-sharing platform, designing intuitive workflows that connect riders and drivers through ride posting, ride requests, route discovery, and fare-splitting experiences.
- Designed streamlined user journeys for key interactions including ride creation, route search, ride requests, and trip confirmation, reducing friction and enabling faster decision-making.
- Created mobile-first, high-fidelity interfaces and interactive prototypes for both rider and driver experiences, covering onboarding, ride discovery, user matching, trip management, and confirmation workflows.

Runners Hive – Fitness Marketplace for Runners & Active Communities

- Designed the end-to-end user experience across five core product areas, including run tracking, marketplace discovery, rewards, social engagement, and leaderboard experiences, creating engaging customer journeys.
- Structured the product experience for two primary user groups runners tracking fitness progress and users discovering marketplace products and rewards, ensuring seamless navigation and personalized interactions.
- Created scalable UI components and reusable design patterns for activity tracking, marketplace listings, leaderboards, user profiles, reward states, and run summaries, ensuring visual consistency across the platform.

EDUCATION

Post Graduate Degree in User Experience Design

Humber College

Post Graduate Degree in Web Development & Design

Humber College

Bachelor of Science in Chemical Engineering

University of Lagos

SKILLS

- **UX/UI Design:** User Experience (UX), User Interface (UI), Interaction Design, Information Architecture, Responsive Design, Visual Design, Accessibility, Design Systems, Micro-interactions.
- **Research & Strategy:** User Research, Stakeholder Interviews, Journey Mapping, User Flows, Usability Testing, Competitive Analysis, A/B Testing, UX Strategy, Product Discovery.
- **Design & Prototyping:** Figma, FigJam, Wireframing, Interactive Prototyping, High-Fidelity Mockups, Design Documentation, Component Libraries.
- **Technical & Product:** AI Product Design, SaaS Platforms, Enterprise Applications, Product Requirements Documentation (PRD), API Integration, HTML/CSS, Mobile-First Design.
- **Tools:** Figma, FigJam, Miro, Jira, Slack, Canva, Adobe Photoshop, Adobe Illustrator, ChatGPT.
